Research Fields

Computational Social Science, Complex Network, Machine Learning, Data Mining, Statistical Physic

Experience

Complexity Science Hub, Vienna, Austria

2023 - Now

Postdoctoral Fellow, Transforming Economies

Supervisor: Frank Neffke (Group Leader)

Max Planck Institute for Human Development, Berlin, Germany

2021 - 2022

Postdoctoral Fellow, Future of Work

Supervisors: Iyad Rahwan (Professor), Alex Rutherford (Senior Research Scientist)

Education

Beihang University, Beijing, China

2014 - 2020

Ph.D. in Mathematics

Supervisor: Zhiming Zheng (Academician of Chinese Academy of Sciences), Wei Wei (Associate Professor)

Beihang University, Beijing, China

2010 - 2014

B.S. in Mathematics

Academic Topics

Future of Work

We study the labour market in a perspective of complexity for various topics in economics including skill evolution, automation, employment, et al.

Graph Neural Networks

We build new graph neural network models to solve network problems including link prediction, graph classification.

Network Theory

We use information theory to study fundamental problems in network like centrality, Epidemiology, et al.

Game Theory on Networks

We study game theory on networks with various dynamic strategies

Minimum Vertex Cover Problem

We study the network structure features in minimum vertex cover problem, one of the classical NP-hard problems.

Publications

Evolutionary dynamic of the coupled awareness-epidemic networks with higher-order structure
